CONFERENCE OVERVIEW

The Iraqi International Pain Medicine Conference is a landmark scientific event designed to establish a comprehensive national and international platform dedicated to advancing the science and practice of pain management in Iraq and the region. The conference will bring together leading experts in pain medicine from inside and outside Iraq, creating a dynamic environment for knowledge exchange, collaboration, and professional development. International and regional speakers will present the latest evidence-based updates, emerging technologies, and innovative therapeutic strategies in acute and chronic pain management.

SCIENTIFIC PLATFORM

- Latest international guidelines in pain medicine
- Multimodal and multidisciplinary pain management approaches
- Interventional pain procedures and advanced techniques
- Cancer-related pain management
- Neuropathic and musculoskeletal pain
- Psychological aspects of chronic pain
- Rehabilitation strategies in chronic pain syndromes
- Opioid stewardship and safe prescribing practices

18-19 April 2026

WORKSHOPS & PRACTICAL TRAINING

- Hands-on workshops in interventional pain techniques
- Ultrasound-guided procedures training

VISION

The Iraqi International Pain Medicine Conference aspires to establish Iraq as a regional hub for pain medicine education, strengthen collaboration between national and international experts, promote high standards of patient care, and encourage research and academic excellence in pain medicine.
